PROJECTS

•Hate Speech Detection using Sentiment and Emotional Analysis

Dec 2023 - Mar 2024

This project was implemented as my Major Project for my Bachelor's Degree

- * Developed a framework for detecting hate speech in social-media posts/comments using sentiment and emotion analysis
- * Applied Machine Learning, NLP, and K-Means clustering to identify negative/hate-promoting topics from unstructured text
- * Evaluated model performance using Precision, Recall, and F1-score, achieving 54%, 61%, and 49%, respectively

•A Deep Learning Approach for Bottleneck Detection in IoT

Jun 2023 - Sep 2023

This project was implemented as my Minor Project for my Bachelor's Degree

- * Developed a deep learning-based approach for detecting botnet attacks in IoT networks
- * Applied DNN and LSTM algorithms to identify malicious network behavior and improve botnet detection accuracy
- * Evaluated model performance to enhance the accuracy and reliability of IoT botnet detection

TECHNICAL SKILLS

Languages:

- * Python
- * C Programming
- * C++ Programming

Skills:

- * Data Structures and Algorithms
- * Object-Oriented Programming
- * Machine Learning and Deep Learning Concepts
